Hiring Manager  
IBM Canada  
8200 Warden Ave.  
Markham, ON, L6G 1C7

Dear Hiring Manager,

I am excited to apply for the position of Associate Developer at IBM Canada as advertised on Workopolis. I am currently pursuing my bachelor's degree in computer engineering, where I gained an extensive background as a software developer. I am passionate about leveraging my skills in front end development, software integration, and programming languages such as Java, Python, JavaScript, and React to create impactful solutions and contribute to IBM's innovative projects.

During my time as a part-time front-end developer at AFSHAHIN Corporation, I have designed and developed 14+ websites, each requiring its own unique approach to the UI/UX design and functionality. I've worked directly with clients to translate their business requirements into fully functional websites, reinforcing my ability to develop software that meets real-world requirements. Furthermore, my full-stack experience includes working on an AI-powered chatbot deployed on Microsoft Azure, where I used React and Node.js to create a dynamic front end with the backend being powered by Python.

In addition to my experience in front-end development, I am actively improving my skills as a full-stack developer by participating in hackathons, allowing me to work in fast-paced and collaborative settings, and also by developing personal projects that drive me to push myself beyond my limits. By consistently challenging myself and learning to adapt to the latest technological advancements, I am prepared to collaborate with IBM's innovative minds in creating solutions with far-reaching impacts.

IBM has played a crucial role in advancing the world's technology as a whole, and your long-standing founding philosophy, "THINK" resonates with my approach to software development. To "THINK" is to push boundaries beyond what is meant to be pushed and to face any challenge with curiosity and determination, and I strive to embrace this mindset in my work.

Thank you for taking the time to review my application. I look forward to discussing how I can bring my skills and passion for software development to IBM.

Sincerely,  
Artin Kiany
